

### RELESA QUALITY POLICY

The Management of RELESA ELECTROWELDED GRATINGS defines its Quality Policy to ensure the quality of its products and manufactured goods, in accordance with the requirements and needs of its customers. It plans quality objectives that are periodically reviewed and evaluated, measures efficiency, and adopts the necessary measures to promote continuous improvement, allowing it to remain at the forefront of quality. This Quality Policy is based on the following principles:

1. A process-based approach to activities, which provides continuous control over the links between them, both individually and within the system of said processes, as well as over their combination and interaction.
2. Maintain all production within the established quality margins. To this end, all RELESA personnel are fully aware of these margins and are fully aware of the importance of complying with them and the need for their involvement in achieving this objective.
3. Analyze data and indicators to correct, prevent, and improve process efficiency and facilitate decision-making.
4. Establish, monitor, and achieve successful objectives that provide benefits, especially to the product and also to the processes.
5. Comply with all requirements specified by the client and achieve maximum customer satisfaction, as well as those established by law.
6. Commitment to continuous improvement of the quality management system..
